# EMP amplitude scales with laser energy on target

## A worked example of the CETAL slide template

Presenter Name, Co-author Name

CETAL, National Institute for Laser, Plasma and Radiation Physics (INFLPR), Măgurele, Romania

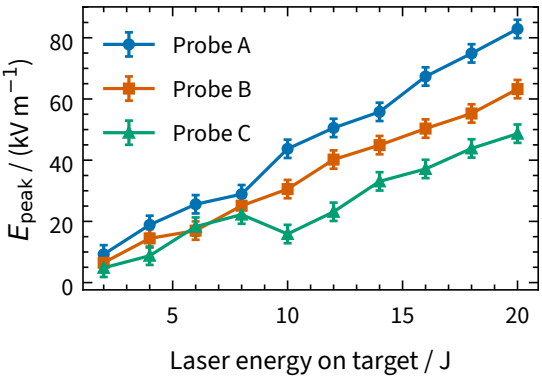
Group meeting · 2026-10-14

INFLPR logo

CETAL

# Results

# Peak field grows linearly with energy on all three probes



- One message per slide, written as the title
- Figures made at final size, text close to the slide text
- Lines differ by marker as well as colour
- Units as quantity / unit: $E$ / (kV m$^{-1}$)

Synthetic example data. Real sources: Author et al., *Journal* **12**, 345 (2026).

# Summary comes before the acknowledgements

1. First conclusion, with its number
2. Second conclusion
3. What happens next

## Acknowledgements

This work was supported by the Romanian Ministry of Research, Innovation and Digitalization through the INFLPR Core Programme LAPLAS VII, contract 30N/2023.
