EMP amplitude scales with laser energy on target

A worked example of the CETAL slide template

Presenter Name, Co-author Name
CETAL, National Institute for Laser, Plasma and Radiation Physics (INFLPR), Măgurele, Romania

Group meeting · 2026-10-15

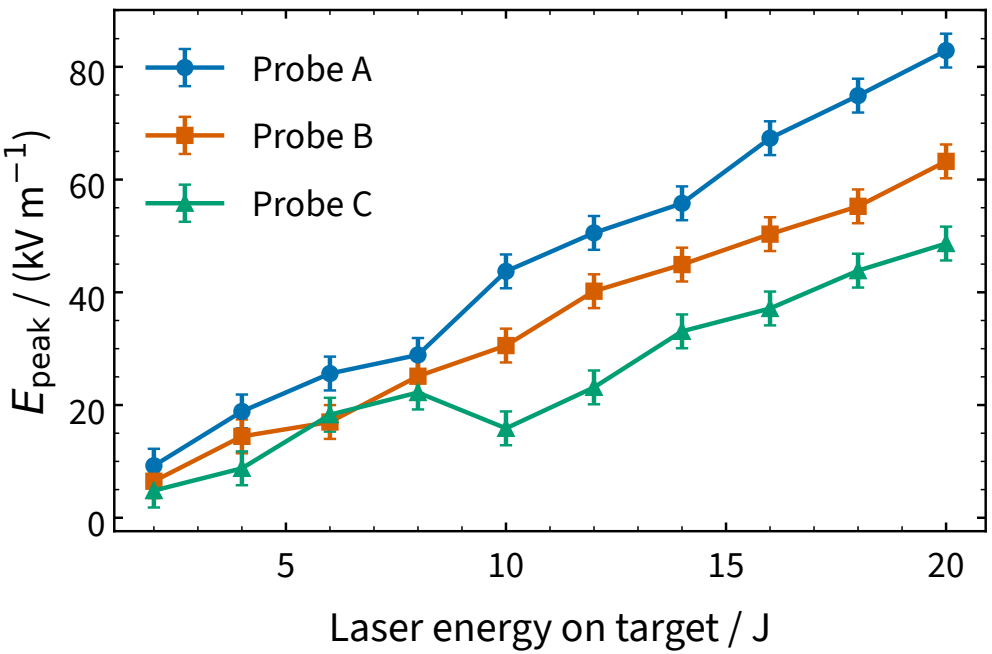
Results

Peak field grows linearly with energy on all three probes



- One message per slide, written as the title
- Figures made at final size, text close to the slide text
- Lines differ by marker as well as colour
- Units as quantity / unit: E / (kV m^{-1})

Synthetic example data. Real sources: Author et al., *Journal* **12**, 345 (2026).

Summary comes before the acknowledgements

1. First conclusion, with its number
2. Second conclusion
3. What happens next

Acknowledgements

This work was supported by the Romanian Ministry of Research, Innovation and Digitalization through the INFLPR Core Programme LAPLAS VII, contract 30N/2023.
